Feedback:

① We absolutely love your line up! Your smart and arresting opening was very exciting indeed! Plenty of energy and commonly felt rhythm was obviously shared among you all. Trumpet section blend is lovely & warm & smooth, with articulation marvellously agreed - well done. A lovely sax blend underpinned the melodic work with warmth and rounded sound, never becoming strident.

② Well done to your exciting and accomplished soloists. Great to hear trumpet & trombone each coming through the mix beautifully. And your percussion solo was a tour-de-force of a musical conversation.

Suggestions for development:

We could see the excellent on-stage communication between you all and this was obviously thoroughly enjoyed by you all as well.

I wonder how much it would be possible to memorize your arrangements? It would be great to grow the on-stage enjoyment amongst you all.

A very professional and accomplished group.

Do you know the Bollywood Brass Band? Seriously rocking saxophone!
